

Port-a-Scoop

PORTABLE POOPER SCOOPER

Patent Pending

“Designed by Vets for Pets”
The full line of Green Friendly,
Hands Free, Sanitary,
Easy to use pooper scoopers

The Problem ...

- New laws now mandate picking up after your dog both at home & in public places.
- Dog feces is unhealthy to other pets and people (*e.coli*, *worms*, etc.)
- Dog feces is unhealthy to your lawn
- Dog feces run-off contaminates our waterways and drinking water supply
- The CDC (*Center for Disease Control*) says the #1 way to prevent human and pet infection is to clean up after your pet regularly.

Did you realize ...

- The average dog poops 15 times a week
4 weeks = 60 poop piles per month
- The average dog owner has 2 dogs
2 dogs = 120 piles of poop per month
- This equals 20+ pounds of poop per month
1 year = 240 pounds of poop!

We offer two models of the Port-a-Scoop:

- Port-a-Scoop Sr. for home/yard use
- Port-a-Scoop Jr., use while walking
